

A detailed white-on-black schematic of a PCB layout. The design features a central horizontal bus with multiple parallel lines. At the top, there are several long horizontal and vertical connector strips, some with small square components. A large, complex vertical structure on the left side includes multiple parallel lines and a series of small square components. The bottom left corner has a long vertical strip of square components. The bottom right corner contains a small cluster of components, including a rectangular block and a circular component. The entire layout is enclosed in a rectangular border.
